

The Causal Relationship between Sanitation and Child Height Effects at Household and Community Levels

Susanna Makela

March 5, 2017

Introduction

Data

Methods

- Pair matching PSUs that are far apart in terms of prop Muslim – “stronger” IV?
- OR pair-matching kids with different HH sanitation status across similar prop Muslim/prop OD PSUs – this could get at the HH-level effect?
- Can we somehow formulate this as an observational version of the Imai et al matched-pair cluster-randomization idea?
